

Cooperation partners

KOBER - www.kober-porzellan.de

KOBER is a supplier for mainly industrial customers, with their own mold construction and mechanical engineering. A family-owned company, founded as a doll's head factory, today an expert in special products made of porcelain: from efficiently produced large-volumes to handcrafted individual pieces.

KOBER

- can produce via dry pressing, wet pressing, isostatic pressing, slip casting, rotating and 3d printing
- does produce: for the sanitary and the chemical industry, lighting and electric, dental technology and cosmetics, handles, wear protection objects and design products

KOBER works as sustainable as possible

- uses 100% electricity from renewable energy
- has its own photovoltaic system, generating about 25% of their electricity consumption
- heat exchangers withdraw energy from the used air of their kilns and compressors
- 40,000 liters of this energy heats buffer tanks and buildings and drying rooms if needed
- during production the remaining porcelain mass is recycled

ARWENN – www.arwenn.com

ARWENN is a new company that rethinks furniture production from the ground up, geared towards millennials, who buy 'only' or 'mainly' in physical stores

ARWENN stores are designed to be understood in 30 seconds, and explored for 30 minutes

ARWENN stands for:

- design based on a few components used accros series and ranges
- manufactured with a local first mindset
- flatpack, easy to transport
- direct available from the shop (cash & carry)
- streamlined production, logistics and operations
- responsible, durable high quality materials
- prices between IKEA and high end

ARWENN is founded by:

Ruben Hutschemaekers, whos worked in the design business with HAY, MAGIS and designers such as Konstantin Grcic, Stefan Diez, Jerszy Seymour
and

Sebastian Schönheit, industrial designer, co-founder/head of product design at New Tendency. He is experienced in the fashion and automotive industry and worked with Google and Nike.

ARWENN opens its first store at the Friedrichstrasse in Berlin in Oktober 2026
